

SABIKA

Software Quality Assurance Engineer | Team Lead

+923095945909 · Sabikalatif2@gmail.com · [Sabika Latif](#) · Rawalpindi

Results-driven SQA Team Lead and Quality Assurance Engineer with 2+ years of experience spearheading end-to-end testing across Android, iOS, and web platforms. Skilled in building test automation frameworks using Antigravity and executing comprehensive manual, API, and UI testing with tools like JIRA, GitLab, and Postman. Proven track record of leading QA initiatives, streamlining CI/CD testing workflows, mentoring teams, and ensuring high-standard product releases in fast-paced Agile environments.

EXPERIENCE

SQA Team Lead | Senior SQA Engineer

10/2024 – Present

Zeesofttech — Islamabad, Pakistan

- Lead end-to-end QA operations across Android, iOS, and web platforms, managing test planning, defect lifecycles via JIRA/GitLab, and team mentorship to ensure reliable releases.
- Developed automated test suites using the Antigravity framework to streamline application workflows and significantly reduce manual regression time.

Software Quality Assurance Engineer Intern

05/2024 – 10/2024

Zeesofttech — Islamabad, Pakistan

- Authored and executed structured test plans, scenarios, and bug reports across native Android and iOS apps, performing functional, regression, UI/UX, and Postman API testing.
- Tracked and prioritized defect lifecycles via JIRA and GitLab, analyzing quality metrics and collaborating with cross-functional teams to streamline sprint releases.

Cross-Platform Mobile Application Developer

11/2023 – 04/2024

Terasharp — Remote

- Developed and maintained responsive cross-platform mobile applications for Android and iOS using Flutter and Dart, integrating RESTful APIs for seamless backend synchronization.
- Collaborated with UI/UX designers and backend engineers to optimize app performance, resolve critical bugs, and deliver stable, high-quality releases.

Software Design & Engineering Intern

08/2023 – 10/2023

Terasharp — Remote

- Participated in architectural discussions, requirements gathering, and rapid prototyping for multi-tier client software solutions.
- Contributed to core feature implementation, routine debugging, and baseline functional testing to guarantee code stability prior to staging deployments.

EXPERIENCE

Teaching Assistant

02/2023 – 07/2023

International Islamic University — Islamabad

- **Assisted in Teaching:** Supported instructors for Social Media Marketing and Technical Writing courses during on-site classes.
- **Graded Assignments:** Reviewed and graded student projects, quizzes, and writing tasks with clear feedback.
- **Student Support:** Helped students understand core marketing strategies and professional writing concepts during office hours.

PROJECTS

◆ AI Math Solver

Platform: Android & ios

Project Description:

An AI-driven educational application that scans and solves complex printed/handwritten math problems with step-by-step breakdowns, graphing tools, and formula modules.

Responsibility

- Conducted end-to-end QA across iOS and Android, validating OCR recognition accuracy, AI solution precision, and camera scanning workflows.
- Verified RESTful APIs via Postman, audited in-app purchase/subscription flows on App Store and Google Play, and logged defects in GitLab.
- Performed performance and regression testing to optimize memory usage, solve edge-case latency, and ensure cross-device UI stability.

◆ AI Voice Keyboard

Platform: Android

Description: An AI-driven input method application featuring real-time speech-to-text voice typing, integrated AI writing assistance, live text translation, smart grammar checking, and tone rewriting.

Responsibilities:

- Developed automation test scripts using the Antigravity framework to validate multilingual keyboard layouts, character mappings, and automated UI workflows across Android devices.
- Executed end-to-end QA for voice recognition accuracy across accents, real-time speech-to-text latency, and cloud-based AI text generation/rewriting APIs via Postman.
- Validated background service stability, memory consumption during prolonged audio streaming, and defect lifecycles using JIRA and GitLab.

PROJECTS

◆ English Dictionary (iOS)

Platform: iOS

Description: A comprehensive language learning and reference app featuring offline word definitions, synonyms/antonyms, voice/text search, camera-based OCR translation, and interactive TTS audio pronunciations.

Responsibilities:

- Executed functional and regression testing across core modules including offline local SQLite/database lookups, camera text extraction, and multilingual translation workflows.
- Validated audio playback speed controls, home screen widget synchronization (Word of the Day), and bookmarking/search history data persistence.
- Tested monetization flows including in-app purchases (monthly/yearly subscriptions, ad removal) and handled cross-device layout validation on iPhone and iPad.

Pronounce and Spell Checker:

Platform: iOS

Description: An AI-powered language assistant offering smart spell-checking, phonetic breakdowns, accent training (US, UK, AUS), camera-based OCR text extraction, live voice translation, and interactive flashcards.

Responsibilities:

- Validated core speech recognition (STT) and text-to-speech (TTS) playback quality, ensuring accurate pronunciation rendering and latency across diverse accents.
- Executed end-to-end testing for OCR camera scanning, offline/online dictionary queries, and live two-way voice translation APIs using Postman.
- Performed compatibility and compliance testing across iOS versions (including iOS 15+ retrofitting), validating App Tracking Transparency (ATT), GDPR consent flows, and in-app purchase subscriptions.

EDUCATION

Bachelor's of Science in Software Engineering

2018 – 2022

International Islamic University — Islamabad

LANGUAGES

English — Proficient
